Jan 4, 2024

Gerson Justiniano

has successfully completed the online, non-credit Specialization

Expressway to Data Science: Python Programming

In this specialization, learners gained fundamental knowledge of Python programming, including variables, operations, flow control, functions, and function creation. Learners experienced and practiced widely used Python packages for Data Science, such as NumPy, Pandas, Matplotlib, and Seaborn. Expressway to Data Science: Python Programming is an excellent resource for learners preparing to complete CU Boulder's Master of Science in Data Science program.

Introduction to Python Fundamentals

Introduction to Python Functions

Python Packages for Data Science

Di Wu
Instructor
Data Science
